

#### Goals

- Discover what factors must be considered before buying stocks and bonds.
- Calculate profits and losses from stocks.
- Calculate commission rates.

# Things to consider before "playing the market"

- Be sure you can afford to lose what you invest
- Set long term and short term goals
- Ask if you have the emotional fortitude to handle the ups and downs of the market
- Plan to spend time and money on the comp you invest in
- Choose an experienced, reputable broker

- Stick to your goals
- Do not expect too much too soon
- Be aware you are buying part of a company, not a lottery ticket
- Have an overall family investment plan to protect you from falling into hit or miss investing

#### Broker

• A salesperson that specializes in buying and selling stocks and bonds.

#### Commission

• A rate or percentage a broker makes for selling and buying stocks and bonds.

#### Full service broker

• gives advice or reports on what and when to buy and sell.

#### Discount Broker

- Only buys and sells. Does not give advice.
- These are mostly online and charge a flat rate for transactions.
- Ex. Etrade charges \$8 per transaction.
- Ex. TD Ameritrade charges \$10 per transaction.
- Scottrade.com \$7 per transaction

#### Round Lot

• 100 shares of a particular stock

## Odd Lot

• A trade fewer that 100 shares

## Stock Exchanges

- Where stocks are traded
- The largest is the New York Stock Exchange
- The American Stock Exchange is the other national exchange in the US

#### Over the counter market

• A national network of dealers and brokers who trade among themselves by telephones, telegraph, or teletype

## Percentage Review

- 1% = .01
- 200% = 2.00
- 6.5% = .065

- .333 = 33.3%
- 4.25 = 425%

#### Commission Cost Formula

- C = prn
- C = cost of commission
- p = price per share
- n = # of Shares
- r = commission rate

- Charlie wants to buy 300 shares of Yahoo! (YHOO) stock which is currently trading at 35 ¼. How much will Merrill Lynch charge if their commission rate is 2%?
- What is the total cost for Charlie to buy the shares of Yahoo!?

- If Lucy buys 250 shares of Texas
  Instruments (TXN) at 42 5/8, what is the commission charge if Charles Schwab charges 1.5% Commission?
- What is the total cost for Lucy to buy the shares of Texas Instruments?

#### Absolute Value Review

- The distance from zero on a number line
- |-4| = |
- |1.2| =
- |-509| =
- |0| =

## Rate of Change formula

$$r = \frac{|P_n - P_0|}{P_0}$$

r = rate of increase / decrease
Po = original price
Pn = new price

- Charlie would like to know what the *capital* gain would be on the original 300 Yahoo! shares if the stock rose from 35 ½ to 38 ½.
- What would the rate of change be for the above example?

- Complete the table by finding total price for the original purchase and the current market.
- Then find the gain (+) or loss (-)
- Then find the percent change
