|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

1. Make sure that you label the axes.
2. Connect each point with a straight line.
3. Find an equation for the line of best fit.
4. Determine what the stock price would be 12 weeks later.
